8. User Management & RBAC in Zoho Creator

Aim

To configure user management and role-based access control in the lost and found application so that each type of user can open and change only what the profile allows.

Theory

Role-based access control gives users permissions according to their duties. In Zoho Creator a permission profile lists, for each form, whether the user can access it and which reports they can view, edit or delete through. Roles place users in a hierarchy, and users are then added with a profile and a role.

Profiles configured

Module	Admin profile	Student profile
Lost Items	Access; view, edit and delete through 2 reports	Access; view through Lost Items Report; no edit or delete
Found_Items	Access; view, edit and delete through Found_Items Report	Access; view through Found_Items Report; no edit or delete
Claim Requests	Access; view, edit and delete through 2 reports	Access; view through Claim Requests Report; no edit or delete

Procedure

1. Open the Users section of the application and select the Permissions tab.

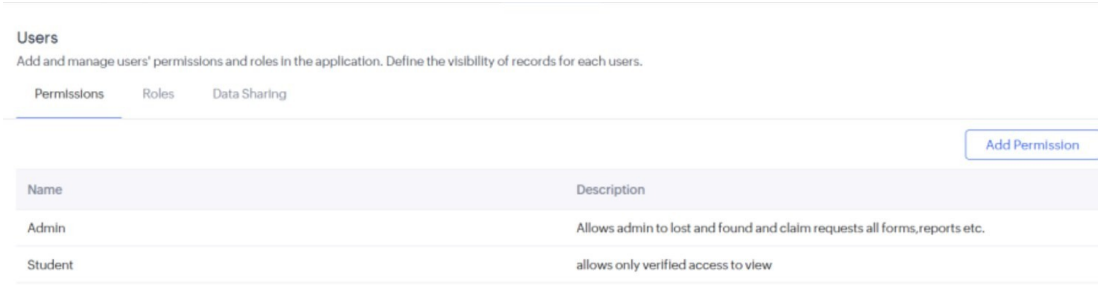

Fig. 8.1: Permission profiles Admin and Student

2. Create the profile Admin with the description “Allows admin to lost and found and claim requests all forms, reports etc.” and give access to the three forms with view, edit and delete rights.

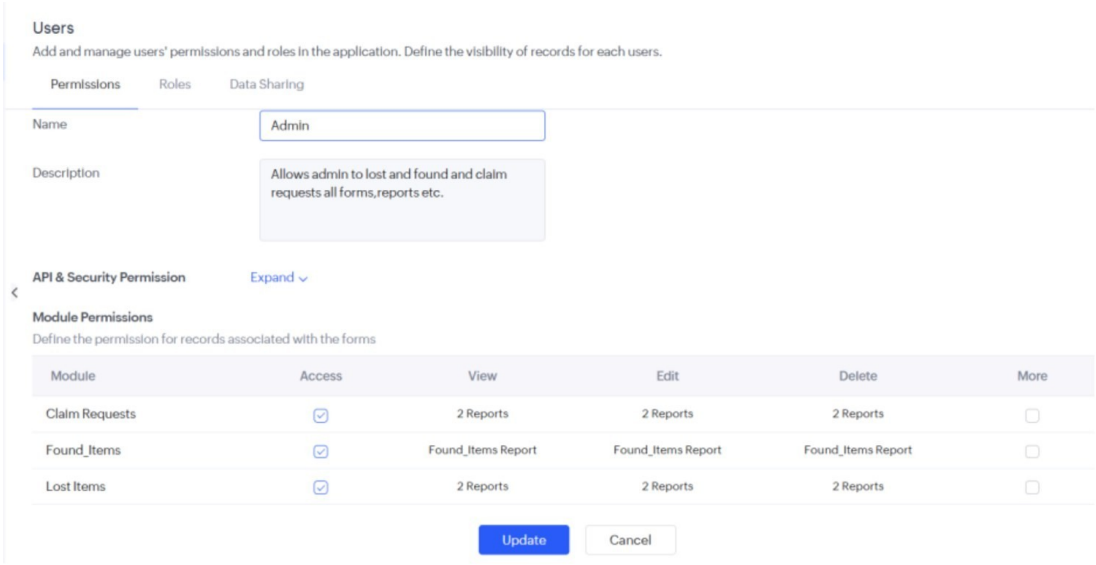

Fig. 8.2: Admin permission profile

3. Create the profile Student with the description “allows only verified access to view”; give access to the forms and only view rights through the reports, leaving edit and delete unticked.

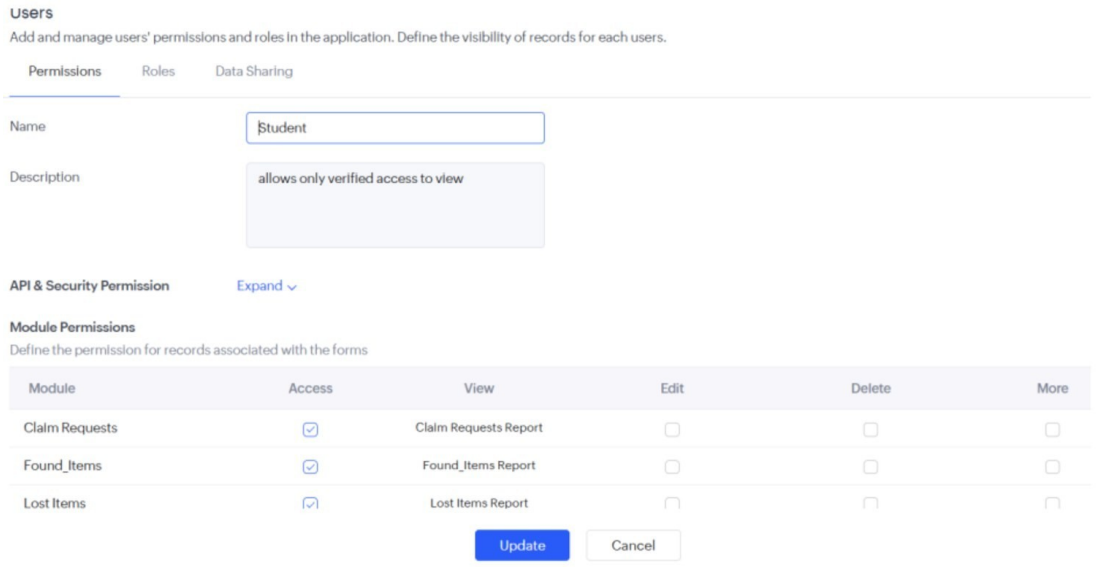

Fig. 8.3: Student permission profile

4. Open the Users page of Zoho Creator to see the users of the account. The owner Darshan Abinav RK is listed as Super Admin with the status Active.

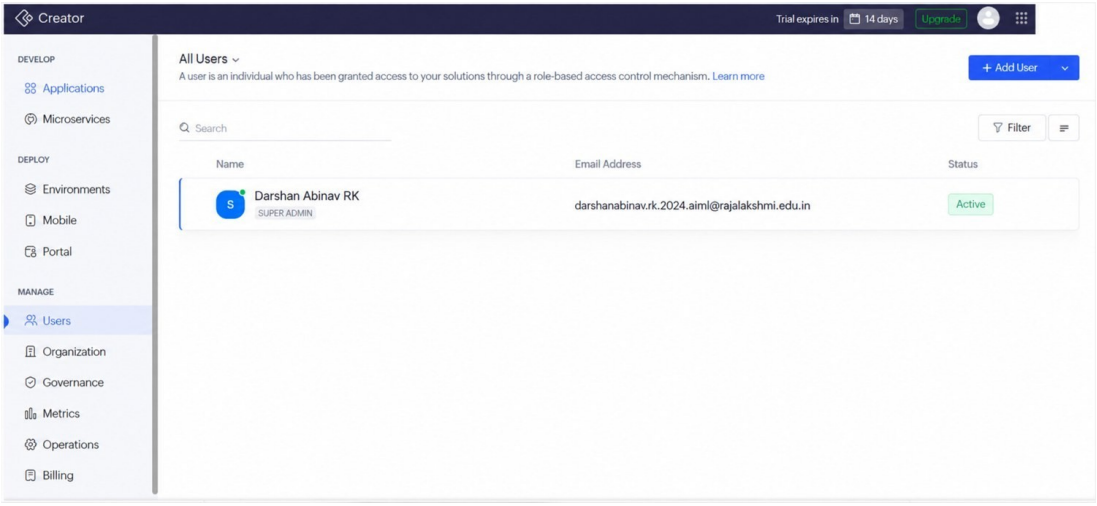

Fig. 8.4: Users page showing the Super Admin user

5. Open the Roles tab and the Data Sharing tab to see how roles and the visibility of records are set.

Result

The permission profiles Admin and Student were configured for the application. The Admin profile has full access to the records and the Student profile is limited to viewing through the reports. The Student profile was checked by reviewing its configuration.
